

Security Snapshot

Compliment your existing Video Surveillance System with the CAV-3000 series. Our CAV-3000 allows scanned ID text to overlay onto your video image. Get a snapshot of Video with ID scanned information for ultimate Due Diligence proof. The AVI-4000 works with your DVR to capture ID verification so you have complete documentation at your fingertips when it counts. Maintain and locate critical events easily, effectively, and affordably.

Our **CAV-3000** customers can also take advantage of the **Bluetooth kit** that allows wireless communication of Driver License & Identification card information.
